The Professional Installer’s 1st Choice!
Lineare Operator Standard Features

Powerful, Smooth and Quiet Operation
Powerful to lift heavier doors. Built-in vibration isolation system for both motor and chassis keeps noise and vibration from being transferred to the rest of the house.

Belt Drive or Chain Drive, T or I-Rail
Choose from our exceptionally quiet belt drive or our solid-performing chain drive, in T or I-beam rail configurations.

Safety First, Safety Always
If the obstacle-sensing beam is crossed when the door is closing, the door reverses to fully open.

Park or Reverse Door
To permit both ventilation and access, the garage door can be stopped and parked during either upward or downward travel.

Secure, Responsive Remote Control
Linear remote controls operate over a long range and employ high-security technology.

Deluxe Wall Station
All controls are large, clearly marked and illuminated (door UP/DOWN control, courtesy light switch, and vacation mode).

Automatic Courtesy Light
Dual 100W MAX lights illuminates the garage for five minutes every time the operator is used.

Easy Door Release
When you need to open or close the garage door manually, simply release the operator’s quick-disconnect trolley.

Assurance Through Self Checks
The operator’s self-diagnostic system continually checks to see whether everything is working properly. In the unlikely event of a problem, it will pinpoint the trouble and let you know by flashing the courtesy light. You can often solve the problem on the spot with a call to your Linear dealer.

Options
Your Linear dealer is a great source for everything from to miniature key ring transmitters and multi-button visor transmitters to wireless keypads.
